EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the abstract, in the beginning, change "Electromagnetic control valve is disclosed. A" to -- An electromagnetic control valve having a--.

REASONS FOR ALLOWANCE

2. Claims 1-44 are allowed.
3. The following is an examiner's statement of reasons for allowance: The primary reason for the allowance of the claims is the an electromagnetic control valve having a permanent magnet inside the space of a valve body, a coil wound around the outside of the surface of the valve body, a yoke fitted to surround the outside circumferential surface of the valve body positioned opposite to the upper part of the permanent magnet that sustains a levitated state of the permanent magnet in combination with a tapered needle making linear variation of the opened area of a orifice.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Pechoux, King and Ruyak disclose permanent magnets with a tapered valve. Hoehn, Torielli, Atterbury, and Buescher disclose electromagnetically actuated tapered valves.
